ARTICLE INFO

Article history:

Available online 12 April 2022

The authors regret that Fig. 1 was taken from a previously published work by Vos et al. (2020), however, the reproduction was not acknowledged in the instant article. Therefore, the authors sincerely regret the omissions of the copyright permissions in the published article. In the light of omissions of the copyright permission, the caption for Fig. 1 in the published article shall be read as under:

Fig. 1. (a) Example of a static beach profile where the cross-shore variations are due to the rise and fall of the tide, and (b) example of a dynamic beach profile where the continuous erosion and accretion of the beach results in scattered observations

(reproduced from a previous study with permission from Wiley, License Number 5264690014868, Vos et al., 2020).

The authors offer their sincere apologies for the inconvenience caused.

The authors wish to acknowledge the reference of the work which was cited in the published article as under:
